TAILOR MADE
MECHANICS

USER MANUAL

«We need to rediscover the meaning and dignity of commitment, the value of the contribution that everyone can add to the construction process, of today and above all of tomorrow».

Sergio Marchionne

TAILOR MADE MECHANICS

The privilege of telling a unique
story: Yours.

«Most people are other people. Their thoughts are someone else's opinions, their lives a mimicry, their passions a quotation».

Oscar Wilde

Dear Friend,

we would like to thank you for making it possible to carry out the present timepiece which we guarantee will remain a unique piece. We created it together, we thought, planned and finally realized all this with the sole intent to make it pass down in time a unique unrepeatably story: yours.

. We have the certainty, even if we do not know You in person, of being moved by the same convictions, those that prevent us from recognizing ourselves in something mass-produced and standardized: we are seeking true emotions, those so rare as to be expressed in a personal language, not audible to most.

«Always creating new evaluations, this is elevation».

Ralph Emerson

We know well how in this life nothing is really ours, except the essential things: the air, the dreams, the sea, the sky. Along with all those things that tend towards the eternal or what we can imagine of it. In all this, the object that flashes on Your wrist is no longer a simple watch: it is an act of self-affirmation, it is the result of the courage of our imagination, it is the secret to hand down that never let die what we really have been in our lives.

the ErrediBi team

«Best ideas do not come from reason, but from a clear, visionary madness».

Erasmus da Rotterdam

IMPORTANT TIPS

Your ErrediBi is the result of complex high-precision industrial processes that guarantee the tight tolerances required for the assembly of its modular case, unique in the world watchmaking scene. The use of a small caliber requires a modification of the winding shaft to be mounted inside the casing through the use of a bayonet stem. To avoid unpleasant incidents during the crown extraction during the watch recharge phase, it is recommended to follow the procedure described on the side.

To clean the watch regularly, use a simple damp cloth. Avoid the use of degreasers /polish that could damage by infiltration internal parts of the watch.

1. Unscrew the winding crown anticlockwise until it comes out of the threaded tube. In this position it will be possible to manually recharge the caliber, turning the crown clockwise for 15/20 complete turns to obtain a total recharge (recommended only in case of a long stop).
2. To adjust the hands, gently pull the crown outwards: it will have to move two positions. Please pay particular attention to this phase as excesses of force could cause the involuntary extraction of part of the winding shaft.
3. When the adjustment is completed, move the crown back towards the case by exerting a firm pressure on it, the latter must move two positions.
4. Re-thread the threaded tube and reassure the crown by turning it clockwise until it reaches the complete stop on the case.

«Nothing is really ours, with the exception of essential things: the air, the dreams, the sea, the sky. Along with all those things that tend towards infinity or what we can imagine of it.»

Cesare Pavese

WARRANTY

Your ErrediBi watch is covered by a warranty for a period of two [2] years from the original purchase date. This warranty covers any mechanical and manufacturing defects. A proof of purchase is required to validate the warranty, in the form of the metal warranty plate supplied or this warranty book dated and stamped by the point of sale. During the period of validity, the guarantee exclusively covers the movement, the hands, the watch face and the body in all its parts (case). A component covered by the warranty will be repaired free of charge or the watch will be replaced if manufacturing or material defects are detected under normal conditions of use. The ErrediBi guarantee does not cover: Glass, strap. Damages resulting from improper use, neglect, accidents or normal wear and tear. Damage caused by water, unless there is an indication of impermeability (5 ATM or higher) on the watch. Indirect damage resulting from defects, inaccuracy or inoperativeness of the watch.

The conventional warranty does not apply if the item reports damage resulting from unauthorized assistance or other factors unrelated to defects in material or workmanship, or if lacking a valid proof of purchase. In the event of questions relating to a repair, or to a repair already sent, contact ErrediBi at info@rdbwatches.it. If the item is under warranty, repairs and return will be made free of charge. For repairs not covered by the guarantee, an estimate of the costs to be approved will be provided before the work starts. The shipping cost for sending the piece to our laboratory will be charged to the customer.
